Machine Learning

Machine Learning Project

For the Glory of the Nation

OUTLINE

- About the Project
- Project Theme
- Project Scope
- Project Assessment

About the Project

About the Project

- The project accounts for 60% of the students' final grade.
- The project must be completed in groups.

Project Theme

Project Theme

- The project theme is “Implementing Machine Learning to Solve Real-World Problems.”
- Each group is free to choose its own project title.
- Each group must work on a unique topic; topics must not overlap between groups.
- When selecting a topic, each group must conduct a literature review of at least 10 research papers published in reputable national or international journals between 2022 and 2026.

Project Scope

Project Scope

- Machine Learning Application
- Presentation
- Documentation, consisting of: Project Proposal; Progress Reports; Final Report; Paper Draft.

Machine Learning Application

The Machine Learning Application Project involves a systematic series of steps to solve real-world problems by applying Machine Learning approaches within an information system.

The project consists of the following stages:

- Problem Identification
- System Requirements Analysis
- Data Analysis
- Data Preprocessing
- Data Processing Procedures
- Machine Learning Algorithm Selection
- Model Development
- Model Evaluation
- Model Storage
- Information System Design
- Model Integration into the System
- User Interface Implementation

Presentation

- Each group is required to prepare a presentation lasting 15–20 minutes.
- Every group member must actively participate in the presentation.

Documentation

Project documentation consists of written documents that describe the project.

Components of Project Documentation:

- Project Proposal
- Project Progress Reports (1–3)
- Final Report
- Paper Draft

Timeline PJBL

Pengumuman Project							
Proposal							
Progress Report 1							
Progress Report 2							
Progress Report 3							
Pengumpulan Laporan Akhir							
Presentasi Project							

Project Assessment

Project Assessment

The grading breakdown for each component of the final project is as follows:

- **Machine Learning Model Quality and Implementation in the Application:** 50%
- **Presentation:** 10%
- **Documentation:** 40%
  - Project Proposal
  - Progress Report 1
  - Progress Report 2
  - Progress Report 3
  - Final Report
  - Paper Draft

Thank You
